Kelly, [Emergency Medicine](#) Physician in Einstein Medical Center Philadelphia, USA.

Emergency Medical Services (EMS) refers to the immediate response medical services that are available at all times in case of urgent medical emergencies. They are a mobile team that involves all types of medical personnel and are also referred to as ambulance services or paramedic services. They aim to provide on-the-spot medical assistance and treatment and transport facility to the closest available definitive care center. Ambulances are the primary units and can also have cars, boats or

aircraft to aid in the transport.

The report on the global emergency medical services market gives an outlook on the current market scenario, the market size, and status. With the increasing number of cases of medical emergencies such as trauma and injuries and accidents, increased spending on healthcare development and high demand for emergency services, the market is set to have a high growth rate in the coming years. The global emergency medical services (EMS) market size stood at US\$19,000 million in 2018 and is expected to reach US\$32,200 million by the end of 2025, with a CAGR of 6.8% during the forecast period.
