

## 33<sup>rd</sup> International Conference on Nanomaterials and Nanotechnology scheduled on June 15-16, 2020 at London, UK

Jianqi Zhang

Inner Mongolia University of Science and Technology, China, E-mail: [jzhang82@imust.cn](mailto:jzhang82@imust.cn)

Nanomaterials & Nanotechnology are interrelated sciences belonging to Materials & Technology departments that are involved in the study of Nanoscience and Material science the helps in combination of two different technology for to create latest and sophisticated product in present market. Engineered nanomaterials hold great promise for medicine, electronics, water treatment and other fields. But when the materials are designed without critical information about environmental impacts at the start of the process, their long-term effects could undermine those advances. Researchers hope to change that.

The [Nanomaterials 2020 conference](#) is a prestigious event that aims to exploring advances of Nanomaterial Science with trending technologies Nanotechnology conference helps to explore the latest research and developments on Material science and Nanotechnology with development in new nanomaterials products at London, UK on June 15-16, 2020. The conference will serve as a platform to bring together leading Engineers and Researchers with different specialties such as Nanotechnologists, Material Scientists etc. [Nanomaterials 2020](#) Conference will discuss on the topics such as Nanoparticles, Nano electronic device, Advance [Nanomaterials](#), Nanotechnology applications, Nanoscale materials.

The global nanotechnology market is expected to exceed US\$ 125 Billion mark by 2024. Nanotechnology continues to have a broad and fundamental impact on nearly all sectors of the global economy, namely electronics, energy, biomedical, cosmetics,

defense, automotive and agriculture among others. The factors such as advancement in technology, increasing government support and private sector funding for R&D, growing demand for miniaturization of devices, and strategic alliances between countries are expected to drive the global nanotechnology market growth. However, the issues such as environmental, health, and safety risks, and concerns relating to nanotechnology commercialization are expected to hamper market growth.

Nanomaterials 2020 supported by the organizing committee network of renowned scientific and professional expert such as **Dr. Osman Adiguzel**, Ankara University, Turkey, **Dr. Mirela Olympia Fagarasan Palmer**, University of Southern California, USA, **Dr. Mohammad Hadi Dehghani**, Tehran University, Iran, it provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas and emerging trends in **Nanomaterials**.

Nanomaterials Conference is going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... and Many More..!!!

**Sophia Angelica**
