Awards Category:

Expert Level:

The recognition of this award resembles to a person's outstanding contribution towards healthcare research for a period. These contributions may be an innovation, new knowledge, or ways to improve professional practice in the field of Cancer Biomarkers, Cancer Pharmacology based upon the research works. Importantly, the contributions towards the presentation should have a long-lasting impact upon the audience for an interactive session.

Professional Level:

Inaugurating a conference is one of the primary responsibilities for every conference organizer. Professionals, having a good knowledge of the event management plan, are well placed to provide training, supervision and assistance to other personnel involved in the organization of the event. Ideally the professionals will grace the stage with developing anticancer products and pain management concepts, from global perspectives. Eminent professional with eventual presentations on Types of Cancer Biomarkers and Cancer Epigenetics will be honored with professional level award.

Scholar Level:

The Outstanding Masters/Ph. are awarded to promote, recognize and reward the most outstanding oral or poster presentation presented by students or young researchers who represent the innovation in the field of cancer genomics. Each year, Chairpersons/Judges will assess and score student presentations at conferences based on the innovative ideas, communication and interaction skills.

Women Scientist:

The concept of award will motivate the women researchers and anesthesiologists to achieve more which will in turn work towards the betterment of conference. The evaluation of presentation will be based upon the biomarker testing and **cancer epidemiology**.

Outstanding Speaker:

Outstanding Speaker Awards are presented to recognize individuals who have made innovative approach to the recent advancements in the field of anesthesia and pain medicine. The award should motivate individuals to strive to realize their fullest potential which could in turn be beneficial. Epic works are not only a testament to the individual's efforts, but they also have the potential to change the whole world as they can lead to gain knowledge from the presentations based on the research technologies related to cancer biomarkers.

Best Keynote Speaker:

Keynote speeches are usually based on the speaker's perspective of future advancements and experiences. They can also include motivational and inspirational elements in the field of anesthesiology. But the most important factor for keynote message success is audience engagement, someone who captures the essence of your meeting and can subsequently highlight it to your audience in a short amount of time, weaving the key message that you want the audience to take away with them, into their speech in a fun and memorable way. Award is given based upon new ideology, strategies and convictions to excel in the field of oncology.

Best Poster Presentation:

Poster presentations are a very important way of sharing significant research and deserve recognition. The presentation gives a framework to visually summarize your work, to engage others in discussions, and an opening to entice others to learn more by reading the full paper. The award will acknowledge work that best represents the purposes, goals, vision and adds new knowledge, contributes innovative research, and/or provides insightful contribution to the field by a bachelor's, master's or doctoral student. This is categorized as representation of article layout based upon the conceptualization of cancer biomarkers.
