2019 Highlights of Journal of Childhood Obesity

Dear Readers,

I am pleased to mention that during the year 2019, all issues of volume 4 were published online well within the time and the print issues were also brought out and dispatched within 30 days of publishing the issue online. JCO during this year also brought out a supplement to March 2020 issue, which consisted of 4 abstracts of "Market Analysis on 9th European Congress on Obesity and Eating Disorders".

During the calendar year 2019, JCO received a total of 21 papers, out of which 4 articles were rejected in the preliminary screening due to plagiarism or being out of the format. During 2019 articles were subjected to the peer-review process and 18 of those were accepted. Average publication lag time of an article was to 6-8 weeks. I take this opportunity to acknowledge the contribution of "Amarjeet Singh" Journal Editorial Board Member during the final editing of articles published and the support rendered by the editorial assistant, Emmanuel S. Jeffrey in bringing out issues of Journal of Childhood Obesity in time.

I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of JCO, the office bearers and staff of secretariat for their support in bringing out yet another volume of JCO and look forward to their unrelenting support to bring out the Volume 5 of IJPS in scheduled time.

2020 Objectives and Topic

The Theme of the year 2020 for JCO:
"Parental Perceptions of Childhood Obesity"

Theoretical Perspectives: Nursing practice is enhanced not only through evidence based practice but with a strong connection between theory and research.

Using Social Media to Promote our Journal

Posting our own journal content and influencing social media on journal.

- Using the four major social media platforms most effectively—Twitter, Facebook, Instagram, and LinkedIn
- A new method to evaluate the social impact of research, Social media is a great, low-budget way to grow your journal's reach and readership
- Promoting our journal on Twitter; using hashtags; pinned tweets of researchers. Tweets of High-quality Images relevant to the articles in your latest issue; tweet it out and then pin it is always shows up as the first tweet anyone visiting our journal profile sees.
- Uploading Journal related images/flyers, profile logo pictures, complete bios that give people an idea of what our journal is about, website links, location.
- Journal's LinkedIn page to researchers works history. This is a great way for prospective authors to take a look to our journal and gives them the confidence to go ahead and make a submission

Thanks and acknowledgments to important Reviewers and Editors for their contribution

First and foremost we express heartfelt appreciation to all authors and reviewers of Childhood Obesity: Open Access. We sincerely giving again big thanks and expressing gratitude to our Journal Editors and Reviewers for performing their vital role in scientific contributions and valuable suggestions; thoughtful comments and efforts towards improving our manuscripts in our journal. Reaching to more targeted and non-targeted audience simultaneously provide the authors their due credibility along with popularity among the scholars working on the same field. On the other hand, valuable scientific information reaches to academicians who are not able to bear the subscription charges and view the articles
