

## Dental management of Non-Syndromic supernumerary teeth near the angel of mandibule

**Badria Al Matrafi**

Prince Sultan Military Medical City

### Abstract

Supernumerary teeth are the teeth present in addition to the normal set of teeth. They may be single, multiple, unilateral or bilateral erupted or unerupted and in one or both jaws. Multiple supernumerary teeth are rare in individuals with no other associated diseases or syndromes. Our case presents with 4 supernumerary teeth in permanent dentition, and its unilateral in right lower jaw, patient have no sinus or pain, so the treatment follow up.
