J Clin Gastroenterol Hepatol Vol.4 No.2:

### Editorial

It is delighted to introduce that Journal of Clinical Gastroenterology and Hepatology with the ISSN NO: 2575-7733 is the one of the most preferred and highly accessed journal for the publishers in the field of Gastroenterology. It is our pleasure to announce that journal published Volume 3 with 4 quality regular in the year 2019. During this year the journal bought out with huge number of conference proceedings on 3rd International Conference on Hepatitis, 4th International Conference on Gastroenterology and Liver Diseases, 4th International Conference on Gastroenterology and Liver Diseases, 11th Annual European Conference on Gastroenterology

The Journal is indexed in IPJCGH in many reputed scientific databases. Most of the cases members of the editorial board also prefer to submit their articles. Such practice is common in other reputed specialty Journals. In fact Journal of Clinical Gastroenterology and Hepatology encourages editorial board members to actively contribute. However, no special privileges are given to anyone. All scientific manuscripts including editorials are subjected to peer review. Follows a double blind peer review process where identity of authors and reviewers is not revealed to each other. The review generally involves two to six subject experts. The editorial team consisting of

associate editors and assistant editors are involved in the entire article cycle starting from submission to final recommendation. The entire review process is carefully structured so as to minimize possibility of bias.

Upcoming volume 4 in 2020 journal is mostly focusing on critical topics of Gastroenterology like Pancreas, Cystic Fibrosis, Chronic Pancreatitis, Liver Health, Oesophageal Cancer, Pancreatic Fistula, Colon Polyps, Appendicitis, COVID-19. We invite scholars, academicians, researchers and industry experts around the global to contribute their scholarly literature findings, review studies or paper, white paper, case studies and research articles on cardiology.

In association with ImedPub group has increased Readership Metrics (By Google Analytics) of Current Research: Cardiology which can be accessed at Google Analytics Metrics for the Journal of Clinical Gastroenterology and Hepatology

I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board, the office bearers for their support in bringing out yet another volume of Journal of Clinical Gastroenterology and Hepatology and look forward to their unrelenting support to bring out the Volume 4 of Journal of Clinical Gastroenterology and Hepatology in scheduled time.
