### Why Netherlands?

The Netherlands also referred to as Holland, is a European Country it is bordered by Germany and Belgium it also comprises of three oversea island territories in the Caribbean. The Netherlands being the most densely populated country in the European Union has over 17.2 million people. It has twelve provinces; five of the major cities are Amsterdam, Rotterdam, The Hague, Utrecht, and Eindhoven. Of which Amsterdam is the Capital of the country, The Hague is the seat of the government and also plays a major role in being the host of international courts and intergovernmental organizations and thus often dubbed the World's Legal Capital.

The Netherlands also flourishes in the field of food and agricultural products, owing to its highly mechanized agricultural sector and innovative agri-food technology. They also contain the headquarters of 19 of the world's leading multinational chemical companies, including Royal Dutch Shell, DSM, AkzoNobel, and BASF. The Country's chemical industry focuses mainly on developing smart materials and new solutions. The Medical technology market in the Netherlands is also an equal competitor to the other sectors with an estimated €4.7bn in 2016. An estimated 500-700 medical technology suppliers are active in the Dutch Medical Technology market, 95%-97% of which are small and medium enterprises making Netherland an Ideal location for Medical Conferences.

The Netherlands being a member of the Schengen Agreement has no border control between the countries that have signed and implemented this treaty. A visa granted for any Schengen member is valid in all other countries that have implemented the treaty. However, a Schengen visa is not valid for travel to the Caribbean parts of the Netherlands.

Thus, with an astonishing economy and growth in both the Medical and other sectors along with awesome places to visit the Netherlands serves as a fitting Location to be the host of International conferences.

Welcome to the flawless Country of the Netherlands and discover the newest possibilities.
