Editorial Note

American journal of computer science and engineering survey is glad to reveal that it has published its 7th volume by 2019. Like previous volumes IPACSES releases issues yearly without any delay. American journal of computer science and engineering survey is a peer reviewed journal which is very fast as usual with esteemed professionals and professors with good skills. IPACSES is having 2349-7238 as its International Standard Serial Number (ISSN). Professionals throughout the world are acting as editorial board members and many reviewers from different countries act as active members for our journal for peer review process.

According to the frequency many articles are released for an issue. These issues include research, review articles, case reports, short communications etc. Soon after receiving the manuscript the article will sent for preliminary quality check and result will be known within few hours of initial submission whether the article is accepted or rejected. On an average the article acceptance or rejection will be informed to author within 21 to 30 days of initial submission.

Authors, editors, reviewers and publishers can easily track their manuscript flow in the Editorial tracking system. Authors can easily submit their manuscript in the editorial tracking system of journal through the link provided on the home page of the journal. Authors can easily track their manuscript status through the credentials given to author at the time of submission. As it is a peer reviewed process our reviewers play an important role in providing review comments of the article to proceed further. I would like show the token of gratitude to the reviewers and also the editorial assistant who is working on the journal for final editing and proofing of the manuscripts before publication.

IPACSES has used social media networking platform to interact with authors, reviewers and editors along with public and professionals throughout the globe in 2019. Journal is having followers in Twitters where we post latest updates related to computer science on daily basis. IPACSES also provides

WhatsApp contact numbers for queries related to topics to be covered in our issue release to authors or editorial team for easy access. American journal of computer science and engineering survey is also having linked in account.

By 2019, IPACSES has completed 7 years in publication with many peer reviewed articles with the support of the authors, editorial team members and reviewers. In future we are expecting many more articles will be published in our journal in the same scope and speed.

We would like to thank our readers for their support who read our articles throughout the globe only possible because of the open -access platform. Our journal provides google analytics report and visitor's frequency results in the success of our journal. American journal of computer science and engineering survey is constantly attracting viewers across the world. Readers from the different countries visit our journal home page to learn about the ongoing research activities in this field. Around 30 million website visitors were there for American journal of computer science and engineering survey according to the latest google analytical report.

In the 2020 we include several conferences, editorials and many new upcoming issues which is going to be part of our journal. In 2020 our main aim and objective is to publish many more qualitative articles time to time. We always update conferences in our journal and we also invite esteemed professionals and people throughout the globe.

American journal of computer science and engineering survey provides same features aims and objectives like previous years of 2019 for Authors and reviewers. Editorial team plays a crucial role in journal and support us in providing authors with good benefits. With the support of the editorial team we also bring special issues accordingly for authors qualitative research work within the in the scope of our Journal. In future we welcome the authors to submit their qualitative research work for our journal and make us to reach greater heights for the benefit of our journal for good recognition throughout the globe.
