

Reappearance of bone in an unusual case of Disappearing of Bone Disease – through Homoeopathic treatment

Dr.Tarul Jadhav

Smt.C.M.P.Homoeopathic Homoeopathic Medical College, Mumbai, India

Abstract

Gorham's Disease or Disappearing bone disease is a rare incurable disease affecting the bone architecture with a variable prognosis. The purpose of this article is to show a case of disappearing bone disease of a 29 years old male who was diagnosed and treated with conventional line of treatment available then for almost 4-5years and still continued to progress. With homoeopathic treatment which we started we could see in a span of two years the bone configuration reappearing in him. Further investigation to reassess him could not be done as he was already financially burdened. This clinical and radiological improvement in such a rare case for the first time certainly shows we now have a new avenue of management of such cases too with homoeopathy which hasn't been possible as yet.

Biography

Dr.Tarul Jadhav, is Assistant Prof. in the Dept of Surgery in Smt. CMP Homoeopathic Medical College, Mumbai, India. She has been managing the orthopedic OPDS and IPDS since 2010 along with eminent orthopedic surgeons through Homoeopathic line of treatment unless the case demands otherwise, the post-operative cases too. Being the certified yoga teacher herself she has conducted camps for orthopedic patients and takes a delight in teaching them to get back on toes. Her expertise is in managing cases of ortho especially those cases of backpain with or without post-operative relapses or unwilling to undergo surgery for their own personal reasons. Having experienced severe backache, herself she knows how much of a significance does the perception of patient alter with illness and affects the outcome too and therefore the need to cater to the same

with Homoeopathy and yoga. Her unique way of seeing every patient in new light and the identification of the psychodynamic correlation events of life to the chief complaint makes her strike the connections with patients instantly. Currently is working towards building a community especially mothers, especially after this pandemic emotional breakdown that she has seen her patients undergo. It's here that she wants to help them learn to manage their stress with her unique integrated approach and is helping them online achieve the same. She continues this message through the youtube channel, podcasts and blogs too, coz she believes that health (mental and physical) is for all to enjoy despite the challenges life throws at us.
