## HEALTHCARE QUALITY REVOLUTION IN KINGDOM OF BAHRAIN

### Mostafa Sharif Azzam

Affiliation Information: Bahrain, AL Janubia, West Riffa, Block 904, Building 399, Raod 414

**H**ealthcare Quality Management concepts and standards became an obligatory way of Healthcare Facility management relued and stated by the regulatory bodies all over the world. In GCC, especially in Kingdom of Bahrain, it is just started recently to take a place as an improvement roadmap for high quality of medical services and directly affecting the patient care standards and treatment plans. Governmental & Private healthcare sectors realizes the importance of National Accreditation and how it can improve the overall services for external & Internal stakeholders. In 2017, National Accreditation process of Healthcare facilities started in Bahrain in line with huge change of the Healthcare running module in the country including a Comprehensive Medical Insurance program for citizens & expats, which generated a lot of Investments & business opportunities to be initiated and developed to reach the anticipated outcome of this changes. Late start of this changes & regulations, uncovered deficiencies in Healthcare management practices and skills in both governmental & private sections, and here coming the role of healthcare quality experts and how they can minimize the transit stage of the healthcare revolution by guiding the existing, start-up and up-coming healthcare facilities to help in providing the best healthcare services & ensure the most appropriate implementation of patient care practices.
