I am pleased to introduce Journal of Oral Medicine (JOM), Open Access journal includes a wide range of fields in its discipline. Scholarly open access journal aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of Research articles, Review articles, Case reports, Short communications, etc. The journal publishes high quality manuscripts from basic, fundamental, applied research developments in Medicine and Dentistry. Oral Medicine concerned with clinical diagnosis and non-surgical management of non-dental pathologies affecting the Orofacial region. It lies at the interface between Medicine and Dentistry concerned with the oral health care of medically complex patients - including the diagnosis and management of medical conditions that affect the oral and maxillofacial region. Journal aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of Research articles, Review articles, Case reports, Short communications, etc.

I am pleased to announce that, all issues of volume 4 were published online well within the time and the print issues were also brought out and dispatched within 30 days of publishing the issue online during the year of 2020.

The Journals aims to flourish and to maintain the standards in research and practice, provide platform and opportunity to present evidence based medicine and analytical assessment of research and probably it is much indeed for students, teachers and health care professionals to enhance the patient care.

During the calendar year of 2019, JOM received a total of 50 manuscript, out of which 40% articles were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. During 2019 around 10 articles were subjected for publication after they are accepted in the peer review process. In the 2 issues of Volume 3 published during the
