

2020 Conference Announcement on Insights by Cardiologists

Saeed Lafta

Saeed Lafta, Faculty of medicine, Department of Medical Physiology University of Kufa, Iraq, E-mail: saeedlafta25@gmail.com

[Cardiology](#) is a medical specialty focusing on the structure, function, pathology and disorders of the Heart System. Diseases which affect the heart is the major challenge to a [cardiac surgeon](#) now a days.

Over the past decades Cardiology has gathered an increasing amount of attention. There are evidences that the heart plays a major role in lives of human creature. Over the time, our understanding of the link between heart that associated with many other organ disorders has evolved. The new therapeutic targets in [heart surgeries](#) would be the focus of future research.

According to the new market research report, the *cardiology* advertise was USD 19.79 billion in 2016 and expected to reach USD 20.68 billion by 2022.

The meeting was meted out through numerous sessions, during which the discussions were hung on the subsequent major scientific tracks:

- Heart sickness & Failure
- Cardiac And vessel analysis
- Heart Devices
- Heart Surgery
- Diabetes, avoirdupois & Stroke
- Pediatric medical specialty
- Heart identification & Medication
- Hypertension
- Pharmacology Of Heart
- Cardiac Nursing
- Women medical specialty
- Arrhythmias

Cardiologists 2020 vie a crucial role in promoting multidisciplinary interactions between science and drugs to boost analysis in Heart. The program lined current and rising analysis innovations within the field of Cardiology. The conference aims a subject matter: "Cardiologists Meet for healthy heart". The meeting engrossed a part of cognizant discussions on novel subjects like heart condition & Failure, operation, cardiovascular disease, lady's medical specialty, Cardiologists and totally different Case Reports On medical specialty. The abstract and applicable

information shared, can foster structure collaborations to nurture scientific accelerations.

We square measure appreciative to all or any or any our speakers for encouraging and supporting United States of America to conduct the conference and catapulting constant to pinnacle of success.

EuroSciCon LLC, on behalf of the conference, congratulates all the participants international organization agency place their efforts in all displays and sincerely wants them success in future endeavors. Cardiologists 2019 would not have reached the highest if not with the support of International, multi-professional commission and coordination of the International Journal of Cardiovascular Research, Journal of Cardiovascular Diseases & Diagnosis, Journal of Clinical and Experimental Cardiology; so, we've got a bent to specific our deep sense of feeling.

Global longitudinal strain accurateness in prediction of ischemic heart disease and the most recent research are going to be illustrated by **Saeed Lafta**, Faculty of medicine, university of Kufa. in the "23rd Edition of International [Conference on Insights by Cardiologists](#)" scheduled during March 23-24, 2020 in London, UK. With the help of our esteemed Organizing Committee Members this conference is expected to be one of the most successful and productive events in the history of EuroSciCon Conferences.

Join us to witness invaluable scientific discussions and add to the future advancements in the field of Cardiology in the upcoming "23rd Edition of International Conference on Insights by [Cardiologists](#)" which is going to be held during March 23-24, 2020 in London, UK.
