This market is expected to reach about \$100.7 billion by 2019, registering a compound annual growth rate (CAGR) of 3.8% from 2014 to 2019. The global market for antipsychotic drugs should grow from \$13.2 billion in 2018 to reach \$14.5 billion by 2023 at a compound annual growth rate (CAGR) of 1.9% for the period of 2018-2023. The global CNS biomarker market is projected to reach \$5.1 billion by 2020 from \$3.1 billion in 2015, at a compound annual growth rate (CAGR) of 10.4%.

[Brain Research](#) through Advancing Innovative technology is a research effort launched by the Obama Administration to map the human brain working. In FY 2014, a \$100 million fund was issued in name of the National Institutes of Health. In 2012/13, NIHR had a total research cost of £958.9m, research program's-£208.9m and on infrastructure-£618.9m. The Faculty members of NIHR including senior investigators and fellowships received £100m. The Human Brain Project is the one of the longest running project; the project cost is estimated at 1.19 billion euros and planned to last ten years (2013-2023).

PROJECTIONS: GROWTH IN NEXT 5 TO 10 years

[Psychiatrists](#) - Demand for Psychiatrists are projected to increase from ~18,180 to 21,440 by 2025.

The Human Brain Project- The main goal of the HBP is to deliver a collaboratively built first draft "scaffold" model and simulation of the human brain by 2023.

Healthy People 2020- It is a statement of national health objectives designed to identify the most significant preventable threats to health and to establish national goals to reduce these Psychiatry problems.

WPA Member Societies and Sections plan to increase significantly the number of [Psychiatrists](#) in the near future, and to upgrade the pattern of distribution of the journal. In addition to the original English edition, a Chinese edition of the journal is already being produced. Contacts are ongoing for the production of Spanish, a Portuguese and a Japanese edition.

The journal is also produced in an electronic version, which is sent by email to the Presidents of all WPA Member Societies and the Chairpersons of all WPA Sections. This version is already included in the website of the WPA and of several of its Member Societies and Sections.

Global Burden of Disease: A collaborative Project (2005 to 2030)

WHO launched a number of global public health projects, including the Public Health and Global Initiative on Psychiatry and whose purpose is to increase professional and public awareness of the occurrence, extent and costs of disorders and to emphasize the need to provide Psychiatric & [psychological care](#) at all levels including primary healthcare.

Human Connectome

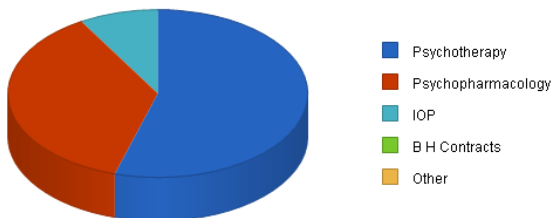

The NIH Human Connectome Project is an ambitious effort to map the neural pathways that underlie human brain function. The objective of Project is to acquire and share data about the structural and functional connectivity of the human brain.

ROOTS: Investigating the origins of adolescent psychopathology

The project will not restrict itself to the study of depression but will encompass many aspects of teenage mental health throughout the demanding adolescent period. The aim is to determine the relative contributions that specific genetic, physiological, psychological and social variables make to the overall risk for psychopathology during adolescence. Teenagers

are recruited into the study at age 14 and will be followed through the adolescent period until they reach 17-18.

Market Analysis (Pie)
