Associate Professor, Head, Division of Cardiology, BC Children's Hospital, Canada., E-mail: ssanatani@cw.bc.ca

Conference Series LLC LTD Conferences invites all the participants from all over the world to attend “**6th Annual Summit on Pediatric Cardiology**” during **October 30-31, 2020** in Vancouver, Canada which includes prompt Keynote sessions, Special talks, Symposiums, Workshops, Oral presentations, Poster presentations and Exhibitions. This congress will be organized around the theme of “Rising modernizations to save lives- Healthy Heart”.

Scope and Importance:

The global market for interventional cardiology technologies makes an estimated \$12.2 billion in 2014. According to a new study by Smithers - The Future of Coronary Artery Disease Medical Devices to 2021 - it will grow to \$22.5 billion (€20.9 billion) by 2021, with a year-on-year increase of 9.1%. Demand for coronary artery disease medical devices will raise through 2021 as clinically viable and cost-effective solutions are developed. Currently North America is the largest geographic region by value with a market estimated to be worth \$4.7 billion in 2014; this represents 38.8% of the global revenue. Smithers anticipates this market will experience an average annual growth of 7% over the forecast period.

The Asia-Pacific region, however, has grown spectacularly in its demand for interventional cardiology devices over the last decade. Today it represents the second greatest geographic region with a market value estimated at \$3.6 billion in 2014 – a 29.8% global market share.

This auspicious outlook will continue with the Asia-Pacific seeing the highest growth rate, assumes by Smithers at an average of 13.3% per year, between 2014 and 2021. This will see it rise to an overall world market share of 38.7% at the beginning of the next decade, with North America at 33.8% pushed into second place.
