INTRODUCTION

The COVID pandemic has changed and shown some path way for building the strengths and weakness etc. As we know, the range of occurrences around the globe. The mode of spread of this virus is notorious and almost it lasts the post-COVID scenarios and even leading to the death. During these unexpected times, the role of the pharmaceutical industries has changed and it is bearing the highest mode of responsibilities to attain the world's health and safeguard their lives. The way these pharmaceutical industries take up and try to provide the medicine to the people is discussed in this short communication.

The pharmaceutical industries throughout the world have changed which came into the limelight and have become a lifeline to the people globally. The pharmaceutical sector has brought up with the many manifestations which started working on various forms of the research in order to safeguard the lives of people. There are several drugs with certain doses such as antimalarial, hydroxychloroquine etc which were the first line drugs for treating the virus. Later on, with the time there came so many medicines for treating the people to those who are with the several symptoms which are like virus attack. Even with the time, there have come many vaccines for boosting the immune system of the individual with 2-3 doses. There is a wide impact on pharmaceutical industries with respect to the COVID scenario. According to the literature, the following are the characteristics that wearables should have [6-8].

An Impact of Pharmaceutical Industry Sector Due To COVID Globally

Risk of linkages between India and China: The Indian pharma-players have got a chance to take the chance to play over the time line and have eventually migrated up with the china's value by focusing on an added value of the formulations.

Supply chain for Indian pharma distribution: The supply chain

is the most important part in the pharmaceutical industry and therefore the supply chain of the APIs has become a burden for the critical APIs.

Major earnings cuts ahead for pharma firms: The pharma sector has an urge in contending and it has a crucial role for attaining the economy. Almost, the pharmaceutical companies have the certain ways to raise the cutting edge of the economy of their individual country.

Relative stability, reasonable valuations: The valuations play the major role in the attainment of the stocks as well as the exposure to which it get offers and with the greater earnings and the support by the reasonable valuations.

Global standing of Pharma in India: In times of the global pandemic, the whole country is low in all the ways and the pharmaceutical industries have the world's greatest demand for the generics.

Post COVID Scenarios in Indian Pharmaceuticals

With the COVID pandemic, the working specimen with no hand to hand contact is robot. The robots play a crucial role and in terms in specific with the articulated robots, they have the highest forms of the share in the marketing. Thereby, there will also be the highest marketing in making the automotive industry for making the robots. These robots play a crucial role in the industries also they have an advantage over handling the dangerous drugs. Whereas, many of the small scale industries got affected with the COVID pandemic, but still the articulated robots have the highest share of the industrial marketing. Therefore, the automotive industries do major work on these robots and the production processes is high. India is having the advantage of replying the heavily building the major provider for the public goods which provide services to the healthcare systems as well as the education and technological supporting

aids. As we know India is having the world's largest API production as well as innovation. Therefore, the majority of the generic manufacturing around the globe is sourced and got from India.

CONCLUSION

Though there are many indigenous industries or providers for the economy, pharmaceutical industries have stood first and

still working restlessly and endlessly to save the people lives.
