

Valuable scientific discussions to contribute future technologies about Cancer Stem Cells

Dr. Kakil Ibrahim Rasul

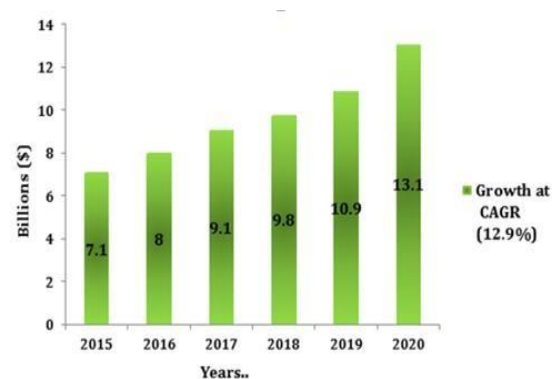

Centre for Cancer Care and Research (NCCCR), Qatar, email: kakil1954@gmail.com

The consultants Meeting on **International Conference on Cancer Stem Cells** is planned to be conducted within the month of November 18-19, 2020 at Lisbon, Portugal. This Conference is CME & CPD authorised. Cancer Stem Cells 2020 are going to be organized around the theme “Expectation and Hype with Innovation and Application”.

Cancer Stem Cells 2020 includes prompt Keynote presentations, Oral presentations, Poster presentations and Exhibitions. The aim of Cancer Stem Cells 2020 is to empower the appealing research field along with the need for commercialization by giving a chance to come across the specialists and Oncologists in the field of Cancer and Stem cells.

Cancer Stem Cells 2020 with the theme “Expectation and Hype with Innovation and Application” aims to share new ideas and new technologies and to optimize and enhance existing systems and it has the latest Oncology research for in the cancer treatment. Worldwide disease drugs advertise represented \$78,238.9 million out of 2016. The malignant growth drugs showcase is driven by the developing pervasiveness of different sorts of disease, expanding request of organic and focused on medication treatments, ceaseless patent expiry of key malignancy drugs and the rising effect of Biosimilars. In any case, the mind-boggling expense of medication

advancement, the danger of disappointment and the antagonistic impacts of disease tranquilize treatment, especially chemotherapy, blocks the market development. Created countries have executed severe guidelines for the structure and advancement of disease drugs. USFDA and European Union have embraced noteworthy activities to fuel the development of the malignant growth drugs showcase by giving pre-advertise endorsement to potential medications under clinical improvement. Asia-Pacific and LAMEA are promising districts for directing clinical preliminaries due an extensive populace base and the minimal effort of clinical preliminaries when contrasted with North America and Europe. In any case, headway of malignancy sedate research attributable to natural/directed treatments and customized medications hold promising open doors for pharmaceutical, bio-pharmaceutical and biotechnology organizations occupied with creating disease drugs.

Our International conference on cancer stem cells conferences mainly focus on topics such as:

Novel Cancer Immunotherapies, Cancer Genetics and Precision Oncology, Future of Cancer Research, Blastoids, Gastruloids and Organoids, Epigenetics and Stem Cell and Medicine, Neurodegeneration, Clinical Trials, Drug Development in Oncology, 3D Bio printing and Bio manufacture, Single-cell Genomics, Tissue Renewal, Cancer and its sorts, Signalling Pathways and Immuno-oncology, Tumor Evolution, Heterogeneity and Pathways, Vaccines, Adjuvants and Biomarkers, Stem Cell and Pathophysiology.

The prominent characters at the gathering were

- Thomas W.kozlowski, Associate Director of Operations, Singapore
- Kunal sharma, Oncopathologist and Molecular Pathologist, SRL Diagnostics India
- Vinay sharma, teacher, University of Witwatersrand, South Africa

- Dr. Joshua ko, partner teacher, Hong Kong Baptist University, Hong Kong
- Dr Daniel Gandia, Clinical Oncologist, National University of Buenos Aires, Argentina.
- Prissadee thanaphongdecha, professor, khonkaen University, Thailand.
- Paulus S. Wang, teacher. National Yang-Ming University, Taiwan.

Conference series LLC LTD takes its pleasure to thank all the Organizing Committee Members, Chairs and Co-seats, Speakers, Students, Media Partners and all who bolstered the gathering in each angle for the presence at the venue.

Conference Series LLC LTD is overpowered to report the initiation of 3rd Global Summit on Oncology and Cancer was sorted out on May 6-7, 2019. Disease Science 2019 will be sorted out around the topic "Perception of cancer free future". The conference is CME and CPD Accredited.
